PULL TRIGGER TO OPEN JAWS,  
LET UP TO CLOSE!

Easy-to-open Free-floating  
Jaws.

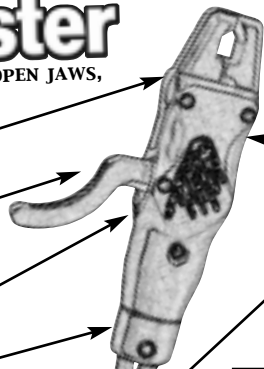

Accuracy comes from a  
trigger that's not attached  
to either jaw!

Sensitivity Adjustment  
Screw

360 degree rotating  
connector

Adjust draw length easily  
by loosening nut, turning  
bolt, and re-tightening nut!  
(Pro Series Only)

Folds back to tuck in your  
sleeve when not in use! Great  
for climbing tree stands!

Silent Release Won't Scare Deer!

Pre-stretched, Torque-free rope!

Available in a black leather  
buckle or camo Velcro® strap!

## GUARANTEE

This product is guaranteed against defects in material and workmanship. If you experience any problem with this product, call 434-929-2800 for a return authorization (RA) number, then UPS ship to: TRU, 131 Crennel Dr, Madison Heights, VA 24572 or Mail to: TRU, P.O. Box 1180, Madison Heights, VA 24572. All returns must have a RA number.

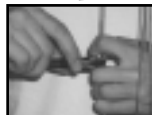

## Sensitivity Adjustment Directions

### Standard, Single, & Double Jaws

Your release is set at the factory within .001" of its suggested setting. To achieve the lightest setting on your own, turn the sensitivity adjustment screw in 1/4 turn increments until it misfires prematurely. At this point, back the set screw out 1/16 turn until the release misfires at a pull of around 50 lbs. or greater. (Hold the string in one hand and pull the release **away from you** with the other hand as in Sample A.) At this point, back the screw out 1/4 turn and your release will be at its lightest suggested setting. To stiffen your release, continue to back the screw out until you reach your desired sensitivity. Use blue Loc-Tite (#242) if release is adjusted more than once! Not for use with thinly braided rope loops! Call us for quality rope material! WARNING-Never draw bow without an arrow. Never point your bow in an unsafe direction. Think and act safely!
